READ-PRINT

Dear Mr. Grant:

This is in response to your letter of October 24, 2022, in which you presented a Local Law entitled “Amending Monroe County Charter and Administrative Code Relating to Legislative District Boundaries and the Term of Office of Members of the County Legislature” (Intro. No. 291 of 2022), which was certified by you to have been adopted by the Monroe County Legislature at a Special Meeting of the Legislature held on October 21, 2022. Pursuant to Municipal Home Rule Law § 21 and § C2-7(A)(3)(c) of the Monroe County Charter, with this letter I am providing notice to the Legislature that I have disapproved this Local Law and am returning it to you with my objections.

As I have made clear, I cannot support the proposed map because it reduces opportunities for communities of color to elect their candidates of choice to the County Legislature. This map packs minority voters into districts that already elect minority-preferred candidates, rather than expanding opportunities for minority representation. Expert analysis has confirmed both the equitable and legal flaws of this map. Despite this, the Legislature majority insisted on charging forward with its plan. In so doing, the Legislature has left me with no choice but to veto this Local Law.

2020–2021: The Legislature Majority Rejects Independent Redistricting and Engages in a Hyper-Partisan Process

In the summer of 2020, well before redistricting began, I proposed that the Legislature create an independent redistricting commission to govern this process. I have consistently maintained that legislators should not draw their own districts. An independent process would have put the needs of the community before the petty partisan interests of incumbent legislators. However, the Republican majority of the County Legislature chose to put their own interests first, and failed to bring this proposal to a vote.

Following this rejection of much needed reform, the redistricting process that began in 2021 was predictably flawed. The process was rushed, lacked transparency, did not provide for meaningful public input, and involved last minute amendments about which scant information was provided to legislators or the public. On January 7, 2022, I vetoed this flawed proposal.

2022: The Legislature Again Draws District Maps Behind Closed Doors

The Legislature's deeply flawed effort to complete redistricting in 2021 again demonstrated the need for an independent process. In January 2022, I reintroduced a proposal to create an independent redistricting commission. Once again, the Republican majority of the County Legislature rejected that proposal.

The Legislature's 2022 process got off to a more promising start, but ultimately fell prey to the same flaws as its earlier efforts. As a first step, the Legislature-led redistricting commission conducted several public hearings and retained ARCBridge Consulting to draw a map based on input received from Legislators and the public. ARCBridge then produced an initial proposal. However, rather than work from this proposed map produced by the consultant hired by the County for this purpose, a group of Legislators and political operatives met behind closed doors to redraw the map. This closed-door process led to the creation of the map adopted by the Legislature.

The Flawed Process Results in an Inequitable and Illegal Map

The map adopted by the Legislature has now been reviewed by a number of experts. These experts have confirmed that the map does not enhance minority representation in the County Legislature and does not comply with the legal standards governing redistricting.

When my administration became concerned that the plan proposed by the Legislature did not advance minority voting rights and did not comply with the law, I retained Dr. Lisa Handley, an expert in statistical voting analysis who has served as a consultant for the U.S. Department of Justice, American Civil Liberties Union, Lawyers' Committee for Civil Rights Under Law, and the United Nations, and Jeffrey Wice, an attorney and law professor who has been one of the foremost redistricting attorneys in New York for four decades, to review the proposal. Dr. Handley's statistical analysis demonstrated that, under the current County Legislature district lines, there are five districts that already consistently elect the candidate of choice of Black voters. Mr. Wice has explained that setting a particular racial percentage target in districts that are already effective in electing the candidate of choice of Black voters is racial gerrymandering in violation of the Equal Protection Clause of the 14th Amendment to the U.S. Constitution, as set forth by the Supreme Court in *Cooper v. Harris* and other cases.

Outside, independent experts have confirmed these concerns. The Manager of the Redistricting Project at the NAACP Legal Defense & Educational Fund, Stuart Naifeh, explained that by creating five majority Black districts at the expense of a sixth minority-opportunity district, the Legislature's plan "potentially reduces representation for communities of color." Mr. Naifeh further noted that the "Supreme Court has said you can't use a racial target trying to create a majority Black district if the voting patterns say you don't need to."

Susan Lerner, the Executive Director of Common Cause New York, “urge[d] the County Legislature to reject the proposed map” for these same reasons. Ms. Lerner observed that the “proposed map appears to pack Black voters into 5 districts in order to eliminate a sixth district which provides minority voters with an opportunity to elect a representative,” while noting that Common Cause was “alarmed at the way in which partisan interests have dominated” the Legislature’s redistricting process.

The public hearing I held regarding the Legislature’s map confirmed the flaws previously noted. Longtime social justice activists detailed how the proposed map actually limits the opportunities of Black voters to elect their candidates of choice to the County Legislature, noting that it does not empower minority voting rights but instead constrains them. I have also heard from community groups such as the Latinx Leaders Roundtable and La Cumbre who have similarly observed that this map reduces the number of minority-opportunity districts.

Additionally, legal experts testifying at the hearing once again confirmed the flaws in the map. Richard Pildes, a Professor of Constitutional Law at New York University School of Law and a leading scholar on voting rights, described the Voting Rights Act and its relation to the Equal Protection Clause of the 14th Amendment. Professor Pildes noted that the Voting Rights Act does not require the creation of districts with a minority population of greater than 50%. Instead, it requires that minority voters have the opportunity to elect their candidates of choice. Setting particular demographic targets in excess of what is required constitutes racial gerrymandering. Mr. Wice testified as to how this conclusion applies to the Legislature’s proposed map: packing Black voters into five districts when those districts are already effective in electing the candidate of choice of minority voters violates the 14th Amendment.

The effect of packing additional minority voters into five districts is to deny minority voters the opportunity to increase their representation in a sixth district. Under the current lines, Legislative District 21 is a majority-minority district that often elects the candidate of choice of Black voters in Democratic primaries. Under the map adopted by the Legislature, Legislative District 21 would become a majority white district, increasing its white voting age population from 43% to more than 60%. Rather than strengthening minority voting rights, the proposed map dilutes them. Rather than strengthening Legislative District 21 to ensure it is a sixth minority-opportunity district, this map packs its minority residents into already-effective districts to create a white majority district. This is illegal and unfair. Although I know that some community members in good faith have supported this map in the hopes of improving minority representation, the data and analysis show that in fact it does the opposite. Indeed, some supporters of this map now appear to be advocating for a sixth minority-opportunity district, as I have called for since I revealed the results of my Administration’s analysis last month.

Prior to the adoption of the Legislature’s map, I released an illustrative map demonstrating what a map with a sixth minority-opportunity district, along with other districts that are compact and appropriately drawn under State and federal law, could look like. At that time, I invited the Legislature to begin negotiations based on that map. Although the Legislature has declined to hold such discussions, I remain open to them.

For all the reasons described above, I have disapproved the Local Law entitled
“Amending Monroe County Charter and Administrative Code Relating to the Legislative District
Boundaries and the Term of Office of Members of the County Legislature” (Intro. No. 291 of
2022).

Sincerely,

Adam J. Bello
